

**NEW!**

# ACCUSTAT *Independence*

A new generation of Accustat®

The Accustat® Independence provides a mercury free option for applications needing a tamper resistant control with fixed temperature set-points.

The Independence utilizes preset electronic fixed temperature setpoints to maintain desired comfort settings.

These thermostats are ideal for commercial applications such as warehouses and fast food restaurants or residential applications such as condominiums or other managed properties.

For customers who have come to rely on the quality and reliability of the original Accustat® series, the Independence offers the perfect solution in those states that have legislation banning the sale of mercury.

## Are you crossing over from an original Accustat® model?

Use this chart as a guide to which Independence model you need.

Accustat Independence P/N	Description	Replaces
